## ***Ride Rules and Etiquette***

1. All riders must obey the rules of the road – this includes all Traffic Signs and signals.
  - If in doubt what the laws are ... check the Utah Bicycle Coalition website for a link to local regulations at <http://www.utahbike.org/resources.html>.
  - Riders must ride two abreast, 1 abreast on SR 32.
  - Riders who are seen violating the rules will be fine \$25 per violation
2. All Riders MUST wear a cycling helmet
3. All Riders must display their rider number where it can be seen
4. NO earphones allowed on the ride.
5. Communicate with your fellow riders, using proper cycling terms, such as “*On your left*,” “*Car back*,” etc.
  - *Car back* ... move to single file on the right hand side of the road or shoulder. Give way to the car... they are bigger than you and they will win.
  - *On your left* ... allow the person coming up behind you to pass safely within the lane; not crossing over into the other lane. If necessary move to the right.
6. Stay to the right, except to pass. Pass on the left side only. Do not pass on the right.
7. Do not cross center line regardless of passing zone.
8. Use proper signals when turning. Make left turns from the center of the road or left turn lane. Cross railroad tracks at right angles.
9. Ride in control of your bike at all times (i.e. being able to stop within a reasonable distance.)
10. Ride defensively, in consideration of your fellow riders.
11. Don't use Aero bars in a group
12. Point out and call out any road hazards ahead. These include potholes, drain grates, stray animals, opening car doors, sticks or stones, parked cars, etc.
13. Do not overlap wheels. A slight direction change or gust of wind could easily cause you to touch wheels and fall.
14. Pedal down hill when you are at the front of the bunch. Cyclists dislike having to ride under brakes.
15. When climbing hills, avoid following a wheel too closely. Many riders often lose their momentum when rising out of the saddle on a hill which can cause a sudden deceleration. This can often catch a rider who is following too closely, resulting in a fall from a wheel touch.
