## Bridger-Teton Employee Earns National Award

**Kemmerer, Wyo.** – Bridger-Teton National Forest wildlife biologist Lara Oles was awarded the Professional Association of Therapeutic Horsemanship International (PATH Intl) Independent Adult Equestrian Recognition Award on November 11, 2011.

Oles was recognized for being an exceptionally outstanding equestrian at the annual meeting and awards ceremony in Lexington, Kentucky.

Oles became inspired after watching the Para Dressage competition at the World Equestrian Games in Lexington, Kentucky in October 2010. She began taking dressage lessons from the National Ability Center (NAC) in Park City, Utah last November.

As there are no indoor, heated arenas in Kemmerer, Oles would drive NAC to continue to ride throughout the winter. This was not Oles' first brush with dressage. She had taken dressage lessons off and on in high school from about 1981-1985, and then briefly from 1990-1992, but had only been riding trail horses since then.

"I was shocked to find out that they (NAC) nominated me," said Oles "and amazed that I won!" she exclaimed. Oles rides a horse named Max, and in June, 2011 she was asked to do a demonstration ride at the NAC annual Barn Party fund raiser. Oles performed her ride in Park City with her Forest Service colleagues in the stands cheering her on. Oles' supervisor, Ranger Tracy Hollingshead, has been particularly encouraging of her riding pursuit. Working with Oles to accommodate her riding schedule, Oles has been able to devote quality time to perfecting her craft. "She has been very supportive," Oles said of her Ranger as she reflected on her accomplishment.

According to their website, Professional Association of Therapeutic Horsemanship International (PATH Intl.), formerly NARHA, was formed in 1969 to promote equine-assisted activities and therapies for individuals with special needs. At more than 800 member centers, a total of 42,000 children and adults find a sense of independence through involvement with horses.

# OLE'S OVERCOMES DISABILITY, EARNS EQUESTRIAN HONOR

LOSING THE USE OF HER RIGHT ARM HASN'T STOPPED LAURA OLES

By Ben Bannister  
STAFF WRITER

**W**ildlife biologist Laura Oles, of Kemmerer has been chosen to receive the 2011 Professional Association of Therapeutic Horsemanship (PATH) International's Independent Adult Equestrian of the Year Award.

"You have to have a disability and have achieved the level of riding independently in spite of that disability for two or more years," said Oles of the honor from PATH. Oles lost the use of her right arm after a skiing accident.

And "independently" means the equestrian can ride without the aid of a sidewalker – someone who will walk alongside the horse and help to stabilize the rider as needed, or lead the horse as directed by an instructor.

Oles was nominated by the National Abilities Center in Park City, Utah, where she has been taking lessons, but she was riding long before her accident.

"I've been riding since I was a child," Oles said. "I especially like dressage."

Dressage is a competitive equestrian sport that is defined by the International Equestrian Federation (IEF) as "the highest expression of horse training."

"It's a riding style that originated in England," Oles noted. "It focuses on precision, balance and the movement

of the horse."

According to the IEF, "Its fundamental purpose is to develop, through standardized progressive training methods, a horse's natural athletic ability and willingness to perform, thereby maximizing its potential as a riding horse. At the peak of a dressage horse's gymnastic development, the horse will respond smoothly to a skilled rider's minimal aids. The rider will be relaxed and appear effort-free while the horse willingly performs the requested movement."

Dressage is often referred to as "horse ballet," because of its fluidity and grace.

"I have a lot of fun taking dressage lessons," Oles said. "But people should know that National Abilities Center offers more than just dressage lessons. They offer ropes courses, skiing, shed hockey, bicycling and have camps."

The National Abilities Center helps kids with autism or Downs syndrome, troubled youths and injured American soldiers in the Wounded Warriors program through equine-assisted activities and therapies.

They also offer riding lessons for all people, whether or not they are disabled.

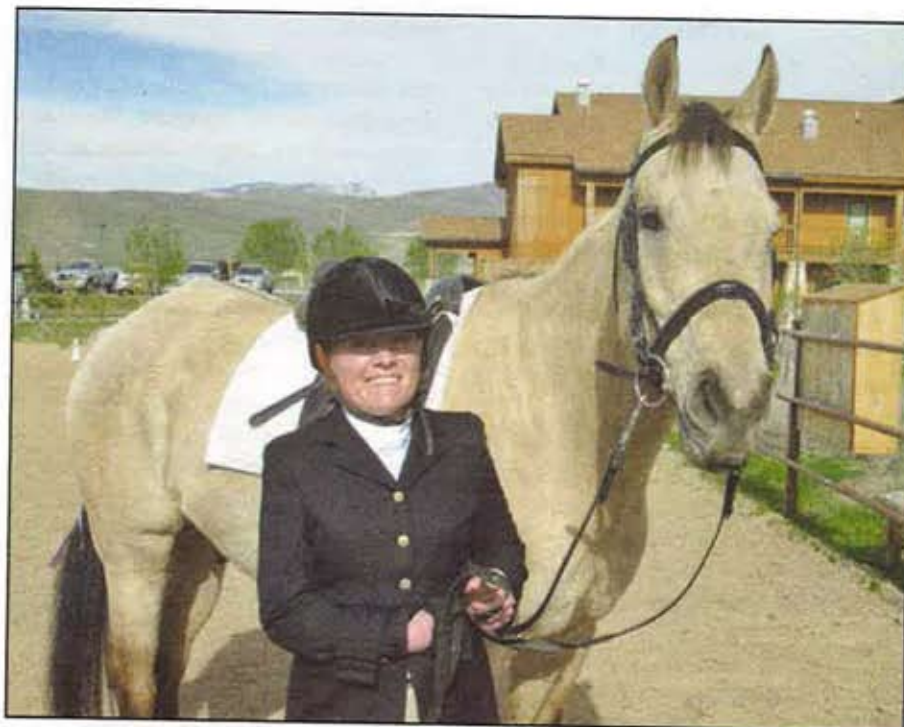

"I'm really glad I found the National Abilities Center," Oles said. "They have really improved my riding skills since the accident, and boosted my confidence."

The National Abilities Center, a member of PATH, also gives Oles a place to ride indoors during the winter.

"There's nowhere to ride indoors in Kemmerer," Oles said. "Thanks to the center, I only missed riding one week last year. This helps me maintain my balance and keeps me from getting sore when I ride outdoors in the spring."

Oles also said watching others ride at the center is inspiring, as she moved toward the door.

"You'll have to excuse me now," Oles said with a smile. "It's time for me to leave for my riding lesson."
