

KIWI

Kiwi was adopted from Furburbia by the National Ability Center in 2002 with his brother, Maui. Since then Kiwi has been a very busy keeping the barn free from mice and other rodents. Kiwi is an excellent hunter and has provided many entertaining scenes for our participants. He is very athletic and can be found all over the barn and arena.

PATCH

Patch, affectionately referred to as “Fat Patch”, was a feral cat that picked the National Ability Center as his home in 2005. When he first showed up, Patch would sit outside the barn and cautiously watch everyone. Then one day, he found the self-feeder and never left. Patch has become a fixture in the barn office and is very handy as a seat-heater in the winter. He is a very affectionate cat who likes to strike some entertaining poses during his frequent and lengthy naps.
