**At NAC since:** November 2005  
(winters only)

**Leased From:**  
Rick & Maureen Sutherland

**Sponsored By:**  
Paul & Pamela Yelinek  
Platinum Sponsor

## **Biography:**

Cisco is a 15 hand Missouri Fox Trotter. He is leased from the Sutherland family, the family of an instructor in the horseback riding program because they could see how perfect he would be for this job. Cisco is special to the NAC herd because he has different characteristics that stick out from the rest of our horses. Cisco is very loveable, calm, and friendly. He loves playing with people almost as much as he loves mealtime. Cisco has a gaited trot which allows many participants to trot who would otherwise not be able to sit or post the standard two-beat trot.

One such participant, Jerry, rekindled his love for horseback riding on the back of Cisco. Jerry has Multiple Sclerosis (MS) and because of this his opportunities for participating in his old pastime of horseback riding temporarily dwindled. Jerry longed for the days when he used to be able to freely trot or canter his horse out through the hills. It wasn't until Jerry and Cisco paired up that this once again became a reality. It didn't take very long for these two to click. They had an instant understanding of what they both wanted. Without much hesitation Jerry and Cisco were off in a trot and soon a canter, accompanied by a huge smile of satisfaction on Jerry's face. Please help Cisco to continue to spend such quality time with people like Jerry.
